

KLove - in our area, 89.9 and 104.3 has had a positive effect on my family and in our community. I would personally like to see this station kept on the air for future generations. I believe that keeping their content on the air benefits the community. People are reminded that God is in control of everything and keeps people centered. Should this content be removed, the airwaves would mirror the other stations that care about financials instead of souls.
